

### **The school system vs. family and civilization:**

School systems are anti-family, anti-male certainly with their active genocide campaign of Ritalin, mind control and programs of discouragement, frustration, attacks of self esteem and leadership, ethics and morality, endless pre-occupation with sports, sexual perversion, entertainment, drugs and total irresponsibility. Anything but work and being an asset to society to help build something solid for the long term, that's the school system.

Schools defrauding students and citizens of the happiness, real freedom and fulfillment from a real high quality life that would otherwise be available and what was normal, and now impossible with the massive dumbed down version masquerading as education, with counterfeit lies and propaganda with their values and mentality that is against life, family, community and nation.

School system crime is so evident to many and it is shocking beyond measure. School systems wage war against students who are assaulted daily, methodically and ruthlessly.

The governments make rules about sexual assault, no calendars or posters of sunshine girls in the work environment, but pedophiles for a minister of education, no problem, pornography and all kinds of sexual perversion, no problem, textbooks and other media for all kinds of graphic sexuality, no problem. People enslaved with all that baggage, corruption and lifestyle brainwashed into, subversion by sociopathic sexual predators and psychological monsters no problem. Mind control and social conditioning to elevate, promote and glorify sexual perversion, no problem, proud about that with no limit, that is so much better they believe. The worst place on the planet to send your kids is the public school system.

Universities and colleges are not far behind, they have been corrupted beyond measure. The liberal arts is liberalism, the total corruption and destruction of values, logic, ethics, morality, good standards. The higher faculties of imagination, reason, logic, is twisted and corrupted down the tragic path of their counterfeit freedom, the freedom to do what you want, as long as it meets their approval, genocide, debt, slavery, crime, treason, violence, injustice, oppressive and tyrannical laws and regulations enforced by homo-fascists working in the legal system.

A straight monogamous relationship, a solid family, forget it. They despise the middle class, family values, true values or anything that is capable of building a long lasting advanced civilization. The family is the foundation of tradition and good values, they hate that.

School systems don't like that nation state either, they are engaged in treason, they do it and teach it, students are instructed to spy on parents and report back, as students confess their values and be subjected to ridicule and attack, psychological experiments and mind control, with a systematic destruction of true values that are to be replaced with counterfeit destructive values, the list is almost endless, tragic and sad beyond measure.

The School system revises history and make good people look bad, they seek to annihilate the foundations of principals that built the country and what can rebuild it. School systems, the mass media and corrupt government share the common front, defrauding others, genocide, treason, crime, propaganda, lies, debt, slavery, poverty, stupidity, hopelessness, destruction, immorality, the end of the family, nation state and all the really good things in life. Incredible, but true, evident like the sun in the sky.

The school system offers the mass production of stupidity, zero logic, juvenile delinquency, laziness and futility of a purposeless existence, the anti-male role model and a super-imposed consensus garbage reality that claim freedom, but enslaves with debt, chains and imprisons people with corrupted minds and bodies, straight jackets people with bad habits and experimental self actualizing stupidity and unwise actions with no long term vision.

Since that is not enough, school systems promotes hazardous lifestyles and philosophy that is completely contrary to true values, family values, community prosperity, nation building and the incredible quality of life that would otherwise be possible. Paid for by tax dollars, to destroy that source of it all. School systems, like many governments enforces genocide and death, defrauds everywhere by any type of crime imaginable by corrupt faculties and misguided and immoral character, these problems are all products of the school system.

Naturally, the family, like individuals have their enemies. The school system and government is generally against families. Liberalism is anti-real family. Many political parties are anti-family, anti-wealth, anti-free enterprise, and anti-faith, unless their faith, their governing beliefs and ideals is actually a religion, certainly nothing based on peace, order and good government, but fundamental liberalism, advanced genocide by hypnosis and corruption.

The good news is that honest work, trade competence and happiness from a fulfilling career is something that can easily and naturally be promoted from the domain of the family. The family is a place where good traditions may be passed on, where individual creativity and imagination, can be promoted, where the productivity and prosperity of the family can create wealth, unity and purpose, a sense of family pride and accomplishment, happiness and peace. The family is an asset with traditions, purpose, values, capabilities and wealth, assets to society. The family can also be a fortress against everything that seeks to destroy it.

It is remarkable how the society of the school system seeks to destroy it, and at least divide it and render it a total mess, while re-inventing their corrupt counterfeit version of it, their new false definition - their consensus reality. People don't usually want to talk about it, but a moral code and solid ethics is important. This typically was promoted in church, a solid religious ideal, a superior moral code, and in families with a strong sense of right and wrong, wise and unwise. This is always under attack by the school system, television, printed media in one form or another, radio and internet. If you look for it, the evidence will be right there in plain sight, some of it hidden deep in agendas, some just below the surface, and in attitudes.

These attacks are often promoted with their situational ethics based on immorality, law breaking and corruption of society. Evident and covert, subliminal programming to finish it off, more conditioning, it is their sport, don't you worry. Don't tell me what to do or not do, I can make my own decisions...really? Yes we can see the path to destruction, genocide and death.

Even churches and religions have been corrupted by all that garbage genocide liberalism. They practice it, teach it and promote it, there are few people, churches or religions that will defend and promote spiritual law and morality, anything else, no problem. Few people really question why and why not, they don't look down the road to oblivion, extinction, tragedy or anything else, not to prosperity, successful families, relationships and nation building.

Just about anyone can be deceived and corrupted...yet there are people who choose something else, a different kind of freedom, a freedom free from all the bad things that result from what Liberalism promotes, promises and programs into society, super-imposes and forces incessantly to end civilization and any shred of righteousness, intelligent patriotism, truth, beauty, goodness, altruism, noble character, moral courage or any real justice.

Finally, if you really like horror, bad news and reality shows, perhaps you can read, "The War Against the Family". While your at it, read "Liberalism" that will teach you, you will be a genius then, your vote will be at a whole new level. Then you will know the real deal.

Your mission tasking is already cut out for you, defend Canada. You already know what to do! Protect Canada, your industry, enterprise, family, friends and yourself from the destruction...
