

Battlegroup 301 Incorporated - Renaissance & Transformation

EXO_9 - [Invest in Made in Canada eh! - National Economics](#)

The best part of money, brains, power and ideas is that we can exercise our power of command, directing our energies and resources for our major purpose, focus on our goals, make choices and work with all our faculties and resources on what we want to create and experience as an exciting and dynamic everyday reality.

If we consider the idea and ideal of custom made in Canada - we can apply that to developing productive and meaningful jobs and careers, exciting and challenging opportunities, fantastic new wealth creation, prosperity, abundance and a fun, adventurous and enjoyable lifestyle that we really like and want without limit and without parallel anywhere! We know we can influence our destiny by investing in creating our version of an alternate future reality everyday in ways that are directly possible, practical, enjoyable and rewarding.

Since we have a good idea of where we are and where we are going we can generate ideas and action plans and actually step forward today in the direction we imagine with the full intention and expectation of achieving these goals. We confidently know that just writing goals down and taking that first course of action can transform the quantum possibilities of pure energized thought to ever present tangible reality. We trust ourselves to know what we must do and that we can succeed in every way, making any relevant decisions and course corrections along the way to enable and ensure that we can achieve and exceed our wildest expectations and dreams.

When we each realize that the feeling and confidence in ourselves individually and as a group, is essential as our imagination in visualizing actually having achieved those things we desire, we will find that it is simply much easier to do whatever is important in our step by step action plan, as our motivation is from within, our enthusiasm and involvement is priceless and infinitely powerful and alive, we will have that realization that so many incredible opportunities and possibilities exist and even more as we continue to actively be involved in that quest, to experience and express the very essence of that state of awareness, perspective and belief that we truly can and are doing whatever it is that we set our minds and hearts to be, to do and achieve, we can and are right now we are in that realm of making progress.

We choose to be a lot more self-sufficient, we choose to balance the equation, we choose to increase the quality of life and the real productivity of our country and our personal lives. The great news for us is, that solid national economic programs and creative, productive, profitable and sustainable work and lifestyle are able to operate in accordance with the values, ideals and goals we share in common.

Additionally, our choice accepting personal and collective responsibility for our happiness and that state of prosperity, opportunity, challenge, adventure and reward helps creates this reality, as the more we do to make this possible increases our ability in transforming this thought and ideal faster and easier than ever before. So even as we look for evidence to fortify our beliefs, we can apply that to seeing the effectiveness of what we are the essence of our being, doing and re-enforcing our abilities including risk taking, as part of the game, increasing our resolution to succeed as the results of our efforts will have an eye opening experience of what is an amazing and rewarding energetic state and level of satisfaction that nothing else can compare!

Battlegroup 301 Incorporated - Renaissance & Transformation

National economic security is definitely improved by expanding our manufacturing base, more engineering, architecture and construction projects, worthwhile and sustainable agriculture, forestry and eco-system management, more action, adventure and exploration across our immense geo-physical landscape, mixing art with science in new creative endeavours, infrastructure, all kinds of useful life sustaining and life respecting enterprise, entrepreneurs, new products and inventions, ideas and distribution systems, and what is really important is building things right here for the long term. We choose to create and keep jobs, direct our money and resources right in Canada and ensure that where we are, is truly the most exciting place to be!

Ultimate custom design, engineering and manufacturing with pride and precision, speedy efficient service, quality for the long term that will survive the battlefield, workplace and industrial zone, while creating jobs, wealth, opportunity, challenge, reward, adventure and fun, a new spirit of possibility and co-operation faster and better than we ever have before, with dynamic organization and make it happen energy. This is possible, we can do this and more.

Concerning national economics, we have a growth agenda for people, programs, productivity and technology. We choose to optimize facilities, materials and resources, machinery and technology with sound planning and project management, product development, production, services and logistics that can create exciting endeavours, enterprise and centres of learning and skill development, focused on improving our lives today and into the future, a quality of life without equal in Canada.

Our mutual endeavour involves Operations, Programs, Projects, Tasking: Land, Sea, Air, Industrial and Economic forces in addition to strategic investment and corporate development, counter-measures to compensate for all those "anti" - factors and a diversified and sometimes classified Tasking Portfolio for members. In this way we focus on the solutions and creating what we want, nothing else matters.

In our quest towards improved national economics, appealing characteristics that are more evident are mainly a robust, creative, industrial, entrepreneurial enterprise, people and companies who are enthusiastic and involved, generating ideas and dynamic productivity, creating jobs right here in every community that we can be proud of all over the country.

<p>Our vision for a stronger more productive Canada is fortified by the fact that we know and believe that self-sufficiency is sovereignty.</p>

People are realizing that collectively even a small town or group of people can join forces together to create and direct a lot of wealth right in their part of the world, and in the process make the opportunities and assets a lot more interesting and powerful in the process.

The private investment group and organized development programs are even more effective with community based buying group and or co-operative type structures and organizations that involve the production and distribution of local goods and services and also a powerful means of employment generation and new wealth creation. The realization that there really is much more to life than just buying retail, with limited choices, exporting dollars out of the country and being defrauded of an amazing life that could be had by choice!

Battlegroup 301 Incorporated - Renaissance & Transformation

The sudden realization that individuals and communities can become much more self sufficient, investment rich without debt and turning on the power switch directing energy, resources and people in a much more direct and focused way influencing the ability to create the future and exercise a much greater degree of control in manifesting individual and collective destiny is happening now. This is so much better than foreigners extracting boatloads of cash out of the economy and liquidating jobs in the process.

We dare you to exercise your powerful freedom of choice!

Buy, build, save, develop, invest and acquire - Made in Canada and Product of Canada eh!

Made in Canada and Product of Canada is more important now, than ever before, the future hangs in a balance, yet lucky for us, we can each make a personal commitment and decision to choose to buy Made in Canada and Product of Canada, today and everyday, as much as we possibly can. We will be able to do more and more of it as we invest in entrepreneurs, new business ventures, local economies, co-operative networks and powerful investment opportunities across the country that are dedicated to enabling a fantastic quality of life and exciting future to be possible for Canada and those who choose to be involved in something with an incredible vision on a scale without precedence in our history.

Oh Canada, We stand on guard for thee.

National, economic, industry, enterprise and civil defence.

Now is the time for all good citizens to help their country.

This includes you, we are recruiting now!
